The key to effective R&D

Your key to more effective Research and Development is INSPEC'S SDI: Selective Dissemination of Information.

When you join INSPEC'S SDI service, we hold your detailed information requirements in INSPEC'S computer system.

Each week we collate data from thousands of international documents collected worldwide.

Bearing your particular requirements in mind, we scan this data and send you details of the relevant documents.

The unique feature of INSPEC'S SDI service is the continuous monitoring and feedback facility that enables you to alter your information requirements to take advantage of the data we're sending you.

INSPEC'S SDI service operates in the fields of Physics, Electrotechnology, Computer and Control Engineering. Subscriptions to the service range from £65 per annum.

For more details of this service, contact INSPEC immediately.

Topics will keep you in touch

TOPICS is a current-awareness service that enables you to keep up-to-date with the international developments in physics, electrical & electronics engineering, computer & control engineering. Every week we send you details of recent literature relevant to the TOPICS subjects you have chosen from the 48 that are currently available. We send you this information on 150 mm × 100 mm (6 in × 4 in) cards. Each card contains the article title, the author's name, the author's affiliation, source of the article and INSPEC keywords selected to indicate the contents of the article. You can file your cards in whatever order you like and so build a personal card index of up-to-date relevant information. This new service will only cost you £25 p.a. per TOPICS subject.
